COLEMAN SELF CONTAINED GEAR DRIVE STARTER

Lightweight and compact for easy transport with the brute power to start any kart engine in use today. The 28 amp industrial battery has large terminals with vented caps to avoid acid spillage common to less powerful side vent motorcycle units used by other manufactures. The motor is larger, with parts and internal components designed to generate almost 50% more torque than comparable makes.

5/16" hex and 3/8" square driver end.

Part No.	Description	Racer Net
SCGDSB	RH Self contained starter w/battery. (PICK UP ONLY)	\$ 249.95
SCGDS	RH Self contained starter without battery.	225.00

NOTE: Batteries CANNOT be shipped. You can purchase batteries at a parts store or Walmart.
